Dear &lt;INSERT NAME&gt;

AudiCare would like to share this true story...

*"I'm a Nurse Practitioner. For more than a decade I suffered from hearing loss. I couldn't hear my patients and they were beginning to notice. I visited my audiologist who fit me with hearing aids for the first time ever. I realize now, I had been struggling on a daily basis. I was exhausted and had no idea it was because I was struggling to HEAR! I have more energy and a smile on my face! Now, my focus is on treating my patients, not struggling to hear them! I encourage you to find out how better hearing can improve your life!"*

*Dr. Marlene Bevan*

AudiCare is committed to helping you achieve and maintain the lifestyle you desire. During your evaluation with us on <INSERT LAST SEEN DATE>, we discussed how hearing instruments may improve the hearing loss you're experiencing. Your personal relationships and activities you participate in can be positively influenced by the improved sound processing that today's hearing technology can provide.

Our mission as your hearing care provider is to educate you, inform you of your options, create realistic hearing goals, and make you as comfortable as possible, regardless of your decision. The more informed you are about today's hearing device technology, the better we can collaboratively make an educated decision about what would best suit your specific needs.

We will be calling you in the next few days to answer any questions that you might have. You are also welcome to give us a call at <INSERT PHONE NUMBER> to schedule time to review your options with an experienced hearing care provider.

Sincerely,

&lt;INSERT PROVIDER NAME&gt;
